

COALITION FOR HEALTH FUNDING

Marcia S. Mabee, MPH, PhD, Executive Director

January 11, 2007

Representative Nancy Pelosi
Speaker of the U.S. House of Representatives

Representative John Boehner
Minority Leader, U.S. House of Representatives

Representative David Obey
Chairman, Appropriations Committee
U.S. House of Representatives

Representative Jerry Lewis
Ranking Minority Member, Appropriations Committee
U.S. House of Representatives

Dear Speaker Pelosi, Minority Leader Boehner, Chairman Obey and Rep. Lewis:

The undersigned members of the Coalition for Health Funding respectfully urge you to provide a full \$7 billion in funding over the President's FY 2007 budget request for the programs under Labor, Health and Human Services and Education Appropriations bill when you consider the final, year-long continuing resolution. This modest amount simply constitutes a return to FY 2005 funding levels for these vital domestic programs. It was a goal pursued by the Democratic leadership in the 109th Congress, and promised by the Republican leadership to a number of its own members. We hope you will continue to honor this commitment.

Public health programs under the Labor, Health and Human Services and Education Appropriations bill are the nation's primary investment in biomedical, behavioral and health services research, disease prevention and health promotion, access to basic and targeted health care services for the medically underserved, and health professions and nursing education. In FY 2006, these programs lost more than \$1 billion in funding and over 5 percent in per capita spending. Prior to FY 2006, funding for many public health programs was flat and declining, including the National Institutes of Health, which has been a Congressional priority.

Every day, we see the evidence of the importance of making a stronger investment in these programs: the epidemic of obesity with attendant chronic disease is driving up unsustainable costs in mandatory spending; healthcare workforce shortages loom as baby boomers age; the number of medically uninsured continues to rise; many infectious diseases are increasing, not decreasing, and

are becoming resistant to drugs designed to treat them; and millions of those with disabilities, including those with mental illness and substance abuse disorders, wait for treatment and services for longer periods of time.

Please reverse the serious erosion of funding for public health agencies and programs by providing \$7 billion over the President's budget request for the Departments of Labor, Health and Human Services and Education.

Sincerely,

AIDS Action
