MESSAGE FROM GOVERNOR

Dear Colleagues,

Great pleasure while conveying you that our chapter has fulfilled all 18 criteria for "Gold" ranking this year though only eight criteria were enough for an international chapter to secure "Gold". It is judged on the basis of chapter performance on six assessment domains like member engagement, education, finance, infrastructure, membership & professional activities. We are facing little challenges regarding membership although our chapter has registered 5.3% growth over last year membership. Don't forget membership renewal if you want to continue benefits of ACP membership. It gives you an opportunity for upgradation to Fellow (FACP), application for chapter awards, free of cost use of Dynamed, Medeva like soft wares apart from discount in conference registration in India or US. You are also getting chance to participate in various research activities through ACP India chapter. It is not only important to retain your membership but also encourage new members to join us.

Apart from this our chapter annual conference is scheduled for 16th, 17th & 18th August 2024. I believe a good number of participation will be there from different parts of country. Our chapter is becoming popular not only in India but also in neighbouring countries too. Many faculties & attendees are scheduled to come in our chapter meeting from these countries.

Looking forward to your enthusiastic participation in our annual conference.

Thanks & Regards,

Anuj Maheshwari

Governor,

ACP India chapter
